

## Questions to Ask Client

1. What do you mean exactly when you say you want LabView code ported over to Actor Framework? What is involved in the Actor Framework?
2. Why do you want these files changed to the Actor Framework?
3. How is this going to be used once it is ported?
4. Do you want it to be written completely in LabView? Would coding in python be feasible? Would it work with requirements?
5. What is the interaction between our project and Project 2? How much do you want us to synchronize with them?
6. What is the Functional Electrical Stimulation (FES)? How does it work? Why is the Actor Framework needed for data acquisition and real-time control of this device?
7. What kind of access do we have to LabView? Do we have to be in the lab to interact with it? Could we get free versions for the team?
